List of Figures		xvii
List of Tables		xxvii
1.	Introduction and Roadmap	1
	1.1 Behaviour and Rationality	4
	1.2 'Anomalies'	6
	1.3 Environment and Evolution	8
	1.4 The Traditional Investment Paradigm	9
	1.5 A New World Order	12
	1.6 The Adaptive Markets Hypothesis	15
	1.7 Practical Implications	19
	1.8 Organizational Structure of the Book	25

I. FOUNDATIONS

2.	The Origin of Behaviour	31
	2.1 The Binary Choice Model	39
	2.2 Probability Matching	47
	2.3 Risk Preferences	52
	2.4 Idiosyncratic versus Systematic Risk	63
	2.5 Discussion	69
3.	Mutation	73
	3.1 Environments with Mutation	75
	3.2 The Optimal Degree of Irrationality	80
	3.3 Generalization and Simulation	83
	3.4 Discussion	87
4.	. Group Selection	
	4.1 Environments with Factor Structure	94
	4.2 Individual versus Group Optimality	98
	4.3 Multinomial Choice with Multiple Factors	99
	4.4 A Numerical Example	102
	4.5 Discussion	105

II. BEHAVIOUR

5.	Probability Matching	111
	5.1 The Binary Choice Game	113
	5.2 Summary Statistics	116
	5.3 A Model of Individual Behaviour	118
	5.4 Initial Learning	119
	5.5 Decision Autocorrelation	121
	5.6 Probability Matching	121
	5.7 Individual Differences	124
	5.8 Discussion	126
6.	Risk Aversion	129
	6.1 Environments with Mixed Risks	131
	6.2 Individual Preferences	134
	6.3 Risk Aversion and Systematic Risk	135
	6.4 Common Distributions of Relative Fecundity	137
	6.5 Testable Implications	140
	6.6 Discussion	145
7.	Cooperation	149
	7.1 Environments with Interactions	150
	7.2 Behavioural Implications	165
	7.3 Discussion	168
8.	Bounded Rationality and Intelligence	171
8.	Bounded Rationality and Intelligence 8.1 Environments with Intelligence	171 173
8.	Bounded Rationality and Intelligence8.1 Environments with Intelligence8.2 An Evolutionary Definition of Intelligence	171 173 176
8.	Bounded Rationality and Intelligence8.1 Environments with Intelligence8.2 An Evolutionary Definition of Intelligence8.3 Bounded Rationality	171 173 176 177
8.	 Bounded Rationality and Intelligence 8.1 Environments with Intelligence 8.2 An Evolutionary Definition of Intelligence 8.3 Bounded Rationality 8.4 A Universal Measure of Intelligence and its Cost 	171 173 176 177 178
8.	 Bounded Rationality and Intelligence 8.1 Environments with Intelligence 8.2 An Evolutionary Definition of Intelligence 8.3 Bounded Rationality 8.4 A Universal Measure of Intelligence and its Cost 8.5 Upper Bound on Correlation 	171 173 176 177 178 180
8.	 Bounded Rationality and Intelligence 8.1 Environments with Intelligence 8.2 An Evolutionary Definition of Intelligence 8.3 Bounded Rationality 8.4 A Universal Measure of Intelligence and its Cost 8.5 Upper Bound on Correlation 8.6 Intelligence across Generations 	171 173 176 177 178 180 181
8.	 Bounded Rationality and Intelligence 8.1 Environments with Intelligence 8.2 An Evolutionary Definition of Intelligence 8.3 Bounded Rationality 8.4 A Universal Measure of Intelligence and its Cost 8.5 Upper Bound on Correlation 8.6 Intelligence across Generations 8.7 Discussion 	171 173 176 177 178 180 181 185

Revisited 9.4 Finite Memory in Nonstationary Environments 9.5 Sampling with Limited Information 9.6 Discussion The Madness of Mobs 10.1 Political Polarization 10.2 Bias and Discrimination 10.3 Practical Implications 	 171 173 176 177 178 180 181 185 189 190 192 196 197 200 201 203 208 214 227

III. NEURONS

11.	Fear, Greed, and Financial Crises	235
	11.1 A Brief History of the Brain	237
	11.2 Fear	240
	11.3 Greed	245
	11.4 Risk	249
	11.5 Rationality	251
	11.6 Sentience	256
	11.7 Interactions Among Components	259
	11.8 Evolution at the Speed of Thought	263
	11.9 Practical Implications	265
	11.10 Discussion	268
12.	The Psychophysiology of Trading	273
	12.1 Measuring Emotional Response	274
	12.2 Experimental Design	278
	12.3 Results	282
	12.4 Discussion	289
13.	What Makes a Good Day Trader?	295
	13.1 Risk-Taking and Emotion	296
	13.2 Experimental Design	301
	13.3 Results	304
	13.4 Discussion	311

IV. FINANCIAL MARKET DYNAMICS

14.	A Cor	nputational View of Market Efficiency	315
	14.1	The Model	319
	14.2	A Computational Definition of Market Efficiency	321
	14.3	Market Evolution	323
	14.4	A Financial Turing Test	326
	14.5	Experimental Design	327
	14.6	Synthetic Processes and Results	331
	14.7	Discussion	340
15.	343		
	15.1	The Kelly Criterion	345
	15.2	Maximizing Relative Wealth	347
	15.3	A Numerical Example	352
	15.4	Testable Implications	355
	15.5	Discussion	356

xiv Contents

16.	Hedg	e Funds: The Galápagos Islands of Finance	359
	16.1	Hedge Fund Characteristics	361
	16.2	An Overview of Hedge Fund Return Data	367
	16.3	Investment Performance	378
	16.4	Illiquidity	390
	16.5	Hedge Fund Risks	398
	16.6	The Financial Crisis	421
	16.7	Implementation Issues for Hedge Fund Investing	437
	16.8	Discussion	461
17. What Happened to the Quants in August 2007?			463
	17.1	The Data	468
	17.2	Factor Portfolios	470
	17.3	Measures of Market Liquidity	480
	17.4	Discussion	504

V. FINANCIAL INSTITUTIONS AND ADAPTATION

18.	. The Co-Evolution of Financial Markets and Tec	hnology 511
	18.1 Historical Context	511
	18.2 The Evolution of Technology and Finance	514
	18.3 Timetable of Financial Evolution	518
	18.4 The Eight Eras of Financial Evolution	523
	18.5 Discussion	548
19.	. The Role of Culture in Finance	551
	19.1 What is Culture?	553
	19.2 What Determines Corporate Values?	554
	19.3 Examples from the Financial Industry	573
	19.4 Regulatory Culture	577
	19.5 The Importance of Feedback Loops	581
	19.6 Behavioural Risk Management	582
	19.7 Discussion	588
20.	. Regulation and Adaptive Markets	589
	20.1 Measures of Systemic Risk	594
	20.2 The Shadow Banking System	599
	20.3 The Shadow Hedge Fund System	603
	20.4 Behavioural Foundations of Systemic Risk	606
	20.5 A Process for Regulatory Design and Reform	612
	20.6 The Capital Markets Safety Board	615
	20.7 Transparency and Fair Value Accounting	619
	20.8 The Role of Technology and Education	624
	20.9 The Role of Corporate Governance	631
	20.10 Discussion	634
