

# 概率论系列报告

报告题目 (Title): Quasi-stationary Distribution and its  
Application

报告人 (Speaker): 张汉君 教授 湘潭大学

时间 (Time): 11月24日(周一) 下午 3:00-4:00

地点 (Venue): 北京大学理科一号楼 1479

摘要 (Abstract): Let us begin with the talk by recalling the key three questions of quasi-stationary distributions (QSDs); and then we shall talk about many new progresses on above the key three questions of QSDs; and also talk about some open problems on QSDs. Finally we shall discuss the applications of QSDs; especially, we shall talk about how to apply the QSD's results in the interacting particle system etc.
